

Achieve your goals with one of Australia's leading sustainability universities

#1 in Queensland for
our sustainable impact*

Griffith University can support your organisation in an advisory role and with consulting services to help make a difference.

We're committed to making a difference. If your organisation is ready to work towards a more sustainable future, we are here to help. We have successfully supported numerous organisations to improve their sustainable footprint, through a range of strategies and initiatives.

Our world-class researchers tackle local and global challenges, providing solutions that will help ensure a more robust, equitable and environmentally sustainable society to be enjoyed by future generations.

Make it matter

Projects with impact

Griffith has successfully supported businesses to improve their sustainable footprint, with sustainability strategies and initiatives such as:

- Developing climate impact evaluation and sustainability frameworks, strategies and toolkits
- Calculating carbon emissions and development of future emission scenarios
- Artwork Ingredient List – Sustainability in the Art Industry
- Undertaking digital transformation
- Implementing Environmental, Social and Governance (ESG) frameworks
- Building sustainable cities, communities and precincts
- Building resilient and sustainable tourism regions and businesses
- Developing project plans for decarbonising tourism

“The Artwork Ingredient List [is an initiative that] strives to understand the emissions produced in creating artworks, minimize their carbon footprint, and develop more responsible art manufacturing strategies. This transformational initiative would not have been possible without the support of Griffith.”

Gilbert Guaringc

Global Head of Marketing, Sustainability
+ Engagement at Urban Arts Project.

Business advisory and consulting services

In addition to empowering organisations to shift their operations towards their sustainability goals, we can draw on experts from across the sustainability lifecycle to provide comprehensive advice and support.

Waste and circular economy

Carbon and climate change

Leading by example

Griffith has reduced CO₂ emissions by over 1,000 tonnes in the last year by retro-fitting next-gen solar panels, commissioning new energy efficient buildings and by sourcing 50% of its electricity from renewable power sources.

Griffith can help you navigate future trends and demands of a changing world.
