How to…
Connect to Guest Wi-Fi for Windows 10

Introduction

This guide will show you how to connect to Griffith University (Griffith) Wi-Fi on Windows 10 as a guest on campus.
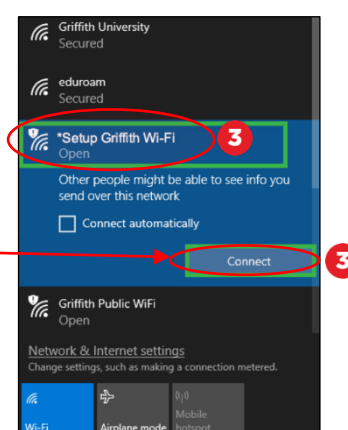

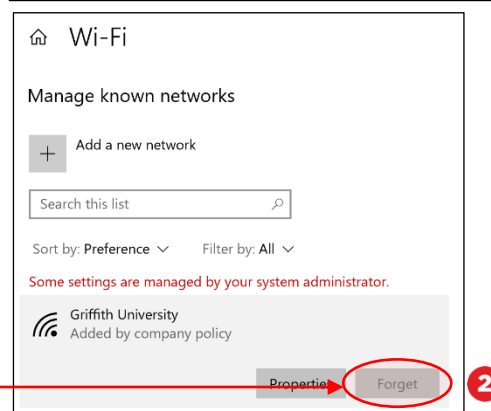

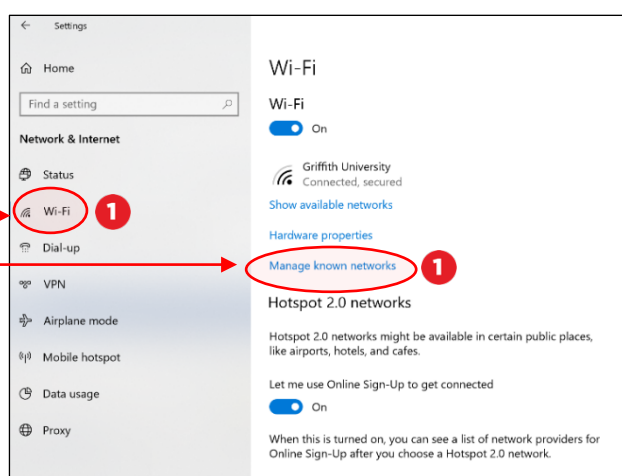

Step 1: Remove the existing Griffith Wi-Fi network on your device

- This step **must** be completed, or the setup process will fail. If you have never connected before, skip to **Step 2**.

① Go to **Network Settings**, then **Wi-Fi** and **Manage known networks**.

② Select **Forget** on the Griffith University network.
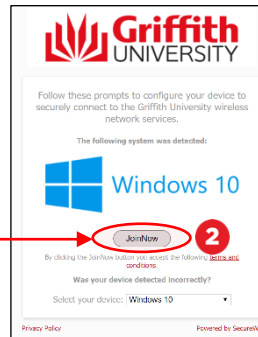

③ Select ***Setup Griffith Wi-Fi** and then **Connect**.

Step 2: Connect to Griffith Wi-Fi

**1**   Open a web browser and go to guest-wifi.griffith.edu.au.

2   Select **Join Now**.

The software will automatically detect the type of device you are using (Windows 10). If the device detected is incorrect, select your device from the **drop-down list** and select **Join Now**.

3   Select **Run** when prompted to download the application as an .exe file.

4   Select **Yes** if prompted to allow SecureW2 app to make changes to your device (note some machines may skip this step).

5   Select **Next**.

Step 3: Authenticate and complete Wi-Fi setup

1 Enter your Griffith username (tNumber) as provided in the Guest registration email, then the password which you were prompted to create as per the email.

2 Select **Done.** The process will take a minute to process and authenticate.

3 Go back into your **Network settings**, select **Wi-Fi** and then select **Griffith University** as your preferred network (it may take up to one minute for the network to appear).

4 Close all setup browsers. You can now use the Griffith University Wi-Fi network. You may still be prompted to log into your internet access account when browsing the internet. Login at https://ias.griffith.edu.au/griffith/portal/login.
